

POLITICAL PARADE

By CLEM WHITAKER

Still wrathful over the setbacks it received at the 1941 session of the State Legislature, organized labor is planning to raise the biggest war chest for next year's legislative campaigns in the history of California politics.

At its annual convention in September, the State Federation of Labor, according to insiders, proposes to set up a legislative fund of a quarter of a million dollars, with a committee of hardboiled political strategists in charge of expenditures.

Present plans provide for the use of about half of this fund in initiating a new reapportionment act which would redistrict representation in the Senate on a basis of population, with labor districts in control. The other half of the fund would be used to elect friends and defeat foes in the Assembly.

The CIO, doubling the AFL's ambitious program, is talking in terms of a half a million dollar budget for legislative work in California, with the bulk of its funds to be used in trying to break rural control of the Senate. The two rival labor organizations, incidentally, will join hands in backing the Senate reapportionment act, but they may split up in some of the Assembly fights.

"Labor is getting realistic in its legislative work," said one of the labor lobbyists, in discussing the new program. "We intend to pick men, finance them—and elect them. We're a cinch to elect a majority in the Assembly, if this plan is carried out, and if we can put over the Senate reapportionment act we will control that house, too. We intend to go first-class; this will be an all-out fight."

The labor spokesmen are emphatic in declaring that they will go ahead with their big money legislative campaign, calling for a combined CIO-AFL fund of around \$750,000, regardless of whether or not they are successful in the present drive to hold up the anti-"hot cargo" act on referendum.

If both the secondary boycott bill and the Senate reapportionment act land on the same ballot, 1942 is likely to be the hottest political year California has had since the famous battle over Upton Sinclair and his EPIC plan back in 1934. Either the "hot cargo" bill or the reapportionment initiative would make a nice warm fight—but both together would be something to write home about. And with eighty or a hundred red-hot legislative fights going on simultaneously in various Senate and Assembly districts, California's political temperature would be really torrid.

Captain Ed Tressler is convinced the most dangerous combination in the world is a car in dense traffic operated by a denser intellect.

Medicinal Plants

Havana will establish a section of typically tropical medicinal plants adjoining the Bosque de la Habana, the cost to be borne by the government and the National Pharmaceutical association.

CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA

Thursday, August 7, 1941

DR. FRIEDLANDER GUEST SPEAKER AT KIWANIS MEETING

Dr. Ernst Friedlander, who at present is doing research work at the county hospital, told of his bitter experiences in Siberia during the first World War, at Tuesday's Kiwanis meeting. He later spent some time in China, and in both countries found medical facilities of all kinds at that time very inferior in the greater part of those countries. Dr. W. I. Merrill introduced his medical acquaintance to the club.

Next week Raymond Fisher, lieutenant governor of Division 12, will make his official visit to the club, giving instructions and information, and reporting on the recent international convention.

President Joe Gomes will be in the chair.

Lloyd Home to Be Scene of Garden Luncheon

A garden luncheon followed by an afternoon of games, sewing or visiting will be held next Wednesday, Aug. 13, in the William Lloyd grounds on Hamilton avenue, arranged by the Women's organization of the Methodist church.

Luncheon will be served at 1:00 o'clock and reservations may be made singly or for tables of four or more. Phone C. 5F2 or C. 308.

N. Y. A. Opens Defense Classes

The National Youth Administration today announced opening of two defense classification shops in San Jose, according to County Supervisor, Theodore Tronson.

Work experience is offered four hours each day in sheetmetal, welding and general woodworking. Openings are available to qualified youth between the ages of 18 and 25 years.

In addition to the four-hour daily work experience, four or five hour classes are also scheduled in the following subjects: welding, machine shop, sheetmetal, and ship fitting. Marine pipe fitting, marine drafting, and marine electricity will open later. Youth workers receive \$25.00 per month for the shop work. The defense training classes require no tuition.

The following schedule of examinations, the successful passing of which is prerequisite for N. Y. A. defense work experience, is announced: Tuesdays and Thursdays of each week, at 2:30 p. m. Morning examination schedule will be arranged on interview at N. Y. A. office at 350 West Santa Clara street, San Jose.

Splits Oak Tree

A metal working machine installed in a Pennsylvania research laboratory to test full-size fabricated aluminum products has split an oak tree with a million-pound thrust.

KEEP HIM THAT WAY!

Mrs. Lura Holmes Called by Death

Word was received by Mrs. Horace Lea of San Jose that Mrs. Lura Holmes, wife of Victor Holmes, had passed away Tuesday in Norwalk.

Mr. Holmes was the former owner of the drug store in the Curry Block, from whom it was purchased in July, 1929, by Dan Clark.

Mr. and Mrs. Holmes visited former friends in Campbell in 1939, when they were en route to the Treasure Island fair.

Mrs. Robert Weaver was hostess Tuesday to a group of young women at a birthday party in honor of Miss Evelyn Krael. Miss Krael also announced her recent marriage to Ray Wolf. She is employed as cashier at Blanco's Campbell theater.

Present to greet the bride were Mrs. C. G. Hooper, Mrs. Paul Smith, Miss La Vay Hooper and Miss Patty Jo Smith, all of San Jose; Miss Claire Lobrovich, Miss Alice Foster and the hostess, all of Campbell.

Masons Plan Ladies' Night

Officers and committees of Charity Lodge No. 362, F. & A. M., are arranging a ladies' night and barbecue for the evening of Monday, August 18, at the W. W. Williams place on Quito road.

Eats will be served at 6:30 and swimming, cards and other games will provide entertainment.

Miss Hattie Depuy, who had been visiting in Van Nuys for a week, was accompanied home Friday by Mrs. Susan Evans, who will remain for an undetermined period.

Clyde E. Melville, film and radio actor and playwright, died of injuries received in an auto accident in Hollywood, word of which was received Monday by his mother, Mrs. Laude Meyer of Campbell. He was killed while crossing the street in front of his home. Jack Meyer, a half brother, also lives here.

First One
William Saroyan is the first playwright to receive both the Pulitzer and N. Y. Drama Critics awards.

Ice Follies Nears End of Current Run

Now nearing the end of its current run at Winterland, the spectacular Ice Follies of 1941, is setting an all-time box office record for bay area entertainment.

Removed entirely from the step-by-step limitations of other forms of entertainment the Ice Follies has developed a personification of grace and rhythm combined with color and beauty. The most masterful effects of modern showmanship have been blended into the production to provide a spectacle which has drawn patrons back time after time.

Comedy is being stressed, along with the graceful performance of highly trained precision numbers which feature the gorgeous "Ice Follies." Comedians include the renowned team of Shipstad and Johnson; Frick and Frack, the McKelland Brothers and others. Evelyn Chandler and Bruce Mapes, Bess Ehrhardt and Roy Shipstad, Fran Claudet and Osborne Colson, Idi Papez and Karl Zwack are among the other famous ice skating stars appearing nightly.

Another matinee with a special scale of popular prices has been set for Saturday, August 9, it was announced.

Ice Follies tickets are available for every performance at Winterland, Walnut 0112; at Sherman Clay box-offices in San Francisco and in Oakland; and by mail order addressed to Winterland, Post and Steiner streets, San Francisco.

Church of the Air Program Sunday, 17th

Originating in Sacramento, in the studios of Station KARM, the Columbia Broadcasting System's West Coast Church of the Air program Sunday, Aug. 17 at 8 a. m., will be conducted by Frank H. Thompson, former First Reader of First Church of Christ, Scientist, Sacramento.

The subject of Mr. Thompson's address will be "Practical Christianity."

Charles L. Merrick, former soloist of First Church of Christ, Scientist, Sacramento, and member of the Sacramento Civic Singers, Light Opera Guild and McNeil club, will be soloist on the program. Mrs. Maude MacSwain, organist of the First Church of Christ, Scientist, Sacramento, will accompany Mr. Merrick.

This program may be heard over the three Columbia Broadcasting System outlets for Northern California, KROY, Sacramento; KARM, Fresno; and KSFO, San Francisco.

People who boast they can stop a car on a dime frequently are the kind who will never have enough brains to earn one, remarks Constable Ethan Lanphear.

CONTRACT FOR NEW UNIT OF SCHOOL LET

Bids for the addition to the Campbell Union Grammar school were opened last Thursday evening, and the lowest one was for \$23,000, submitted by Morrison Reese, Willow Glen builder.

That price was given on a basis of the cost of materials now, and is some \$3,000 more than the board had figured it would cost to add the class rooms to the building.

Reese asked for 105 days for the job, but Ira Abbott expressed the opinion that the difficulty of obtaining materials and labor shortage might delay completion of the building until the first of next year.

Priority needs of national defense are the cause of the shortage, but the increase in school enrollment has been largely brought about from the same cause. Many new families brought to the valley by the increase in industrial plants have located within the Campbell union school districts. An additional 300 children were registered in the grammar school in the past two years.

The original building was planned for additions and since 1922 there have been two classrooms built in 1927, two more in 1928 and an outside shop last year.

Contrary to the general tendency, except for towns near the various training centers or where large plants are working on defense orders, both of Campbell's union schools have and are growing by unusual percentages, instead of declining in enrollment.

The new building includes three classrooms, to be built at the end of the east wing of the school, connected with the main structure by an open air corridor, and designed to permit of further additions.

Binder and Curtis, architects, drew the plans, which call for a Spanish style to correspond with the main building.

Dr. and Mrs. Frank R. Anderson, son and daughter, David and Marilyn, arrived at Balboa Monday and will participate in the Star class boat races in Newport Harbor.

David will crew for a contender in the internationals. Doctor writes that on Tuesday they witnessed the famous "Flight of the Snowbirds," over 200 boats racing, all alike—an impressive and beautiful sight.

Mr. and Mrs. George W. Burrow are reconditioning the interior of their attractive home on Budd avenue.

Owing to a break-down of the Press Intertype, the Los Gatos Mail-News kindly came to our aid and set the balance of type, thus enabling us to complete the publication of this week's issue.

MILE LONG PARADE CLIMAXES DRIVE

As a victorious ending to the 10-day drive in Los Angeles, a mile-long American Defense Parade marched down Broadway from Pico to the City Hall collecting a final installment of aluminum. With floats and bands, and banners flying, nine divisions participated in the march before an estimated 100,000 spectators. Above, the Young Republican float with Young Republicans expressing the need for national unity.

NO FOOD STRIKES

The Dairymen's League Cooperative association of New York, the principal supplier of milk in that great area, recently announced its opposition to the New York "milk strike." The strike, which was accompanied by considerable violence, was started in an effort to increase milk prices to the farmer.

The Dairymen's League pointed out that the proper solution to the milk price problem was arbitration, under auspices of a government commission.

That is a wise course. Much as we may sympathize with farmers who are confronted with rising costs and diminishing earnings, strike tactics are the worst possible thing. The public interest demands that the supply of milk and all other foods be maintained under any circumstances. Public opinion will back the farmer in his search for a living wage—even as public opinion will oppose violence in any form.

* * * * *

HEADS UP PEDESTRIANS!

When crossing busy streets, pedestrians should not daydream. Crossing the street is a very important move and that job alone should be on the mind of the pedestrian who is eager to arrive on the other side of the street safely. Motorists can be expected to cooperate with pedestrians and should be most careful, but the pedestrian must do his part and not put himself in such a position as to make it difficult for the motorist to avoid hitting him.

* * * * *

MINERS TO MEET

Producers of the sinews of the nation's defense effort—iron ore, copper, lead, zinc, tungsten, manganese, molybdenum, mercury, gold, silver and other metals, are planning to meet in San Francisco, Sept. 29 to Oct. 2, at the annual American Mining Congress convention. "Metals for Defense" is the theme chosen for this meeting.

Taxation, labor relations, distribution and economic problems of the mining industry will be considered, as well as the need of adequate priority ratings for mining machinery and suppliers, in order to assure continued capacity production of this great natural resource industry.

* * * * *

CALIFORNIA LEADS

Mirroring California's leadership in aircraft production, this state continues to head the entire nation in airplane pilots, the Aircraft Information bureau reported.

Latest figures from the Civil Aeronautics Administration show that on July 1, California had 9965 certificated pilots. Second on the list was New York with 5765 pilots. The number of California pilots showed a 71 per cent increase over July 1, 1940. This state also had the largest number of certificated aircraft—a total of 2174.

* * * * *

GAS TAX APPORTIONED

State Controller Harry B. Riley today apportioned \$115,555.94 of gasoline tax revenue to Santa Clara county as its share of the \$13,414,447 record distribution for the quarter which ended June 30.

Riley gave the counties \$4,471,482 on the basis of motor vehicle registration. This county's share was based on a vehicle registration of 80,304. The balance of \$8,942, 965 was deposited in the state highway fund.

PANORAMA OF PROGRESS

A panorama of progress in educational methods from colonial days to the present will be spread before the 800,000 visitors expected at the 87th annual California State Fair, opening August 29 in Sacramento, it was announced today.

More than 10,000 exhibits will be presented in the Education Building and school children will present daily programs in the little theater of the building.

Meanwhile, hammers and saws are busy today in the main Agricultural Building, where counties are rushing their exhibit booths to completion. Final construction of the new Hall of Flowers also is being rushed to completion together with the "miracle stage" on which the nightly extravaganza will be staged.

* * * * *

ALUMINUM COLLECTION

OPM Conservation Chief McConnell announced housewives' donation of used aluminum ware during the collection campaign July, 21-29 should permit construction of more than 2,000 additional fighting planes. He said tests indicated a minimum of 15,000,000 net pounds usable in defense manufacture was collected in the national campaign. Civilian Defense Director LaGuardia said state procurement offices of the treasury department will direct shipment of collected material from concentration points in each state to the nearest selected smelter.

Price Administrator Henderson said additional supplies of waste paper and cardboard are needed for packing articles produced by defense industries and urged that waste paper be saved by the household for collection by waste paper dealers.

* * * * *

WE DEFEND THIS TRUTH

What are we arming to defend? What is it that we Americans hold so precious that we are willing to accept great material and physical sacrifices if need be to make sure that it is not destroyed?

Not just the good land we have here, or the wealth of useful goods and products that has been spread among the people of this country. Much as we value these, a better answer than that is needed. And Roy W. Moore, noted industrial leader, addressing the Commercial Law League of America, described our American way in the following words:

"It is the way of liberty. It is the right of a man to think his own thoughts through, and to express them decently in print or by word of mouth. It is the right of assembly and petition. It is the right of protection against tyranny of ukase and edict as opposed to the due process of responsible law. It is the right to choose that device of relations with the Almighty Spirit of Life which best will nurture the individual's spirit. It is the right to choose those officers of governance who must truly represent the will and the conscience of the people, and to hold them to the responsibility of representation.

"And it is the right of the individual to engage in any decent occupation of his choice and to follow it where he wishes, and to reap as his reward such returns as are in decency earned by his skill, his ability, his energy, and his effort."

The words are moving because the force they describe is eloquent, too. Needing clear definitions of where we stand in the difficult world of today, we can all find in the above words a goodly part of that larger truth in which all Americans believe.

* * * * *

With all the talk about "gasless Sundays" that is now being heard, this might be a good time to remember the wry comment being credited here to newspapers in one foreign city that is under totalitarian domination. These ism-fearing papers are reported as saying that the height of luxury in their country is to "spill a drop of oil and wipe away the spot with gasoline."

OUR STATE GOVERNMENT

GEORGE REILLY

STATE BOARD OF EQUALIZATION

(In a new series of articles on "Our State Government," Commissioner George R. Reilly, our member of the State Board of Equalization, plans a streamlined analysis of the most important departments of state government, and their functions. The series when complete will give a comprehensive and informative picture to our readers as to how state government in California works.)

—EDITOR

The Department of Military and Veterans' Affairs, as its title indicates, deals with the California military, or national guard, and administers legislation pertaining to war veterans in California. It is administered by a director named by the Governor and a series of boards, one of the most important of which is the veterans welfare board headed by Anthony E. Boicelli. These boards are named by the Governor as is the adjutant general, who is in charge of the national guard, and other state military organizations.

Other divisions of this department include the division of veterans homes wherein relief is provided for California veterans, the division of veterans welfare which administers the veterans dependents educational act. This division is administered by a board of five members, four of whom are veterans

and all of whom are appointed by the Governor for a term of four years. From time to time various bond acts for aid to veterans have been passed by the voters of California. Included in these was one by which former service men were enabled to purchase farms and homes under a plan somewhat similar to the present F. H. A. program.

* * * * *

The University of California holds a unique position in state government in that it is virtually a separate governmental department. It is controlled by a board of regents, subject to legislative control, which consists of sixteen members appointed by the Governor in addition to eight ex officio members, who are state officials, as well as the president of the university, the president of the Mechanical Institute of San Francisco, president of the alumni association. The members appointed by the Governor serve staggered terms of sixteen years.

DEFENSE BOND QUIZ

- Q. In what denominations are Defense Savings Stamps available?
- A. Ten cents, 25 cents, 50 cents, \$1, and \$5. An album is given free with first stamp purchase to mount stamps of 25 cents up.
- Q. In what denominations are Defense Savings Bonds available?
- A. You can buy a Series E Bond for \$18.75, \$37.50, \$75, \$375, or \$750. The prices of Series F Bonds range from \$74 to \$7,400 and Series G Bonds from \$100 to \$10,000.

Calcutta Black Hole

The Black Hole of Calcutta was a dungeon of the East India company in their citadel Fort William. It was 18 by 14 feet in area and meant for two or three men. When the Subahdar of Bengal stormed the fort on June 20, 1756, he believed that enormous treasures were hidden within it and that the incumbents refused to divulge the hiding place. His guards therefore drove all the white inmates, numbering 146, including one woman, into the cell. At 6 a. m. the following morning only 23 were alive.

Pays More Taxes
Hawaii pays into the United States treasury more taxes than any one of 14 American states, but it is still a territory.

THE BOOK MARK

by marty

If you like murder, mystery and detective stories, well you have all three inside one book, and it is "The Wrong Murder."

Oh, me! I'm tired, if it is possible for a book mark to be tired.

After following Jake Justus, the hero of the story, and his bride of only a few hours, Helene, all through the book trying to help them track down the murdered of an unidentified corpse lying right in the center of State street, Chicago, anything and anybody would be ready to drop, and not care a great deal 'who done it.' Oh, but when you begin the story you feel entirely different and burn up all your energy and enthusiasm in wanting to solve the crime.

The last reader who took the book scarcely put it down until the whole mystery was no longer a mystery. In fact, he didn't go to sleep until it was most time to get up again, but when he finally turned out the light and laid "The Wrong Murder" on the table I distinctly remember hearing him say "Gee, O gee! What a thriller! That writer, Craig Rice, is no amateur. I surely hope that I will be able to get the next one entitled "The Right Murder," which, I understand, carries the story on."

Yes, "The Wrong Murder" and "The Right Murder," by Craig Rice, are most enjoyed if read consecutively, yet each book is complete unto itself. For fast and snappy conversation, I could not recommend more pleasing or exciting material. And as for action—the stories are full of it—dramatic, spicy and colorful. The suspense is hard on the nerves, and it is almost impossible to point your finger to the murderer before the book reveals the truth. Those of you who delight in attempting to discover the murdered before it is revealed will find your delight doubled. While the rest of you who like to be surprised will be pleased no end. For good mystery stories, these two books are on the top shelf.

Women always are unpredictable, wrote Swift. The only people even more so, thinks Officer Frank Weeks, are Sunday drivers.

Health Twins — Bread and Milk

By BETTY BARCLAY

That good old-fashioned supper dish, a bowl of bread-and-milk, is coming into favor again!

It's simple to prepare — a grand team for flavor — and practically a complete food for buoyant good health. Today leading nutritionists have taken up its praise where our grandparents left off. For they've discovered that a bowl of bread-and-milk supplies nearly everything the human body needs.

Vitamin-rich

Pure milk, they explain, is a "protective" food. It's rich in vitamins and minerals that "protect" by helping you to build up resistance. Milk might be called a "beauty food," too, because its food factors are necessary for lustrous hair and a healthy complexion. Grown-ups, as well as youngsters, need the vitamins and minerals in a bowl of bread-and-milk.

Bread for Energy

The modern white bread you get from the grocer or the baker, is made with milk, too. It contains some vitamins and minerals, as well as valuable proteins for muscle and tissue repair. But bread is chiefly important as our best and cheapest energy-food.

Since 85% of all the food we eat is used by the body for creating energy, it's easy to see why bread's been our "staff of life" for centuries.

Not Fattening

A supper-time bowl of bread-and-milk makes a satisfying and a nourishing meal — but it's not a "fattening" food.

One pint of pasteurized or certified milk provides 340 calories. Three slices of bread (the usual ready-sliced type) each add approx-

imately 70 calories more. A generous bowl of bread-and-milk, therefore, supplies approximately 550 calories.

You could actually live on five such bowls of bread-and-milk a day without getting one bit fatter, for the average adult needs from 2,500 to 3,000 calories daily.

Ways to Serve Bread-and-Milk

According to Dr. James A. Tobey, prominent health authority, bread and milk combines to make an ideal "little meal" for children. So — when you're in a hurry — make it bread-and-milk . . . for breakfast, lunch, a fourth meal at four, or for supper. And there are dozens of ways you can "dress it up."

Some like it hot: for a warming dish, simply heat up the milk (but don't boil it). For a cereal-dish, stir bread in hot milk till it's soft, then add salt and butter. Or parch the bread in your oven, and pour browned butter and hot milk over the crisp gold slices.

Some like it cold: try rich slices of baker's bread cut into squares and covered with ice cold milk, served in a deep dish and sprinkled with sugar.

Flavor the milk anyway you like — with sugar and vanilla, raspberry jam, nutmeg and sugar, cinnamon and sugar, chocolate sauce, beaten raw egg and a little sugar.

Or spread the bread with molasses or corn syrup, with butter and brown sugar, with honey, jelly or jam. Let the youngsters discover new bread-and-milk treats for themselves. They'll love the fun of experimenting — and enjoy these "twin foods" for sturdy health all the more!

OUR HIGH SCHOOL

MATHEMATICS

Mr. Cramer - Mr. Drummond
Mr. Dwelley - Mr. Klassen
Miss Smith - Mr. York

In this highly mechanized age, it is impossible for anyone to escape situations that are best solved by a working knowledge of mathematics. It is, therefore, desirable that students should continue, after grammar school, with some type of mathematics.

For those students who plan to go to college, algebra and plane geometry are provided, since most colleges require these subjects for entrance. Advanced courses are provided for those students who plan to pursue certain technical courses in college.

Then for the non-college students of the high school a year's course in general mathematics is given. Here the attempt is made to provide the student with the mathematical tools necessary for the solution of the problems of his every-day life.

MUSIC

Mr. Klassen - Mr. Thielke

The value of each of the musical organizations and classes in school is often overlooked by those who see them perform in parades or in concert. Important as these services are, they are in reality only incidental to the more valuable services, the development of useful and contented citizenship.

The aim of school music might be said to be twofold: first, to help the boy and the girl to sing and play for the joy of it, so that they later on in life may be able to enjoy, not only singing in the home, but also to participate in such community activities as the church, the club, and the the party where music is a major part of the program.

Second, the music class endeavors to help the student to appreciate good music—symphonic and classical music as well as the better type of popular melodies. They have the opportunity to learn how to select good music from the radio as well as from the concert stage.

Water on Exhibit

A drop of water, regarded as a mineral because it has been entombed in a quartz crystal millions of years, has been placed on exhibit at the American Academy of Natural Sciences in Philadelphia.

Garden Forum Luncheon to Be Held Saturday

A richly varied program and display will feature the Garden Forum luncheon that is to be held in the Cafe Esplendido of the Sainte Claire hotel in San Jose on this Saturday, August 9, from 12:30 to 5 p. m.

Mrs. Jerome Landfield, a Fellow of the Royal Horticultural Society of London, England, will talk on "Hardy Herbaceous Perennials." The plants require little or no water or attention. The subject will be of interest to many.

Mrs. Hortense Shaffer of Merced will have seven or eight arrangements of anthuriums, tropical plants of South American which are cultivated in hot houses in this country. These rare and beautiful plants will be a novelty to many.

Hundreds of tuberous begonias will be used to decorate the luncheon tables and make it a flowery and colorful occasion.

Many large parties are being arranged by garden and flower-minded groups. There will also be "no host" tables. The public is cordially invited to attend. Reservations should be made through patrons or at the Sainte Claire hotel, phone Ballard 8500.

Sapphire Worth More

Presence of less than 1 per cent of iron oxide to color it makes a yellow sapphire worth \$125 a carat compared with the \$5 a carat value of a white sapphire.

"MIDDLE-AGE" WOMEN

(38 to 52 Years Old)

HEED THIS
ADVICE!

Are you going thru these "trying years"? Are you blue, cranky, NERVOUS, suffer hot flashes, weakness, dizziness, and distress of irregular periods—caused by this period in a woman's life? THEN—

Take famous Lydia E. Pinkham's Vegetable Compound. For over 60 years Pinkham's Compound has helped hundreds of thousands of grateful women to help calm unstrung nerves and to lessen annoying distress due to this functional disturbance.

Lydia Pinkham's Compound is one medicine you can buy today made especially for women. Telephone your druggist right now for a bottle. WORTH TRYING!!

Laughing Around the World
With IRVIN S. COBB

The Truth from the Inside

By IRVIN S. COBB

THE dining car waiter was one of those persons who feel a sense of personal proprietorship in the institutions they serve—a type not at all uncommon among the members of the colored race in America. So

when the gentleman who was going to California gave a breakfast order of grapefruit, toast, coffee and soft boiled eggs, he bent over the patron and in confidential tones whispered:

"Boss, I would not keer to recommend the aigs this mawnin'. Naw suh, I would suggest you tuck somethin' else on the bill."

"What's the matter with the eggs—aren't they fresh?" asked the customer.

The waiter's voice sank still lower.

"I don't know ef they's fresh or ef they ain't," he said; "but to tell you the truth we ain't got any."

VISITING GOVERNOR CONGRATULATES
NEW PRESIDENT

Stopping in Los Angeles to address the United States Chamber of Commerce against the Federal control of State water rights, Governor Carr of Colorado congratulated Howard Levine on his recent election to President of the Los Angeles County Young Republicans. From left to right, President of the Young Republicans, Howard Levine; John Cole, Executive Vice-president; Governor Carr, and Joe Crail, past State President of the Young Republicans and prominent Los Angeles business and civic leader.

Platinum Resistance

High resistance of platinum to corrosion and oxidation has made this metal essential for chemical equipment in processes where high purity of product is essential. Lately, the field of such uses has been considerably broadened by the availability of platinum-clad, a thin cladding of the precious metal bonded to one or both surfaces of a base metal, usually copper or nickel.

Still Wondering

Joseph W. Martin, house Republican leader, was recently offered a ride in an airplane by a wealthy Democratic oil operator. He accepted but still can't figure out whether the offer was due to the stiff oil regulations of the New Deal or whether it was a real gesture toward hospitality.

Independent Order of Odd Fellows • Morning Light Lodge No. 42 meets every Thursday evening in I.O.O.F. Hall. Sojourning members are cordially invited to attend the lodge meetings.

EVERY SCHOOL CHILD NEEDS
Illustration of a woman and children looking at a book.

BETTER LIGHT for BETTER SIGHT
AT HOME!

In most cases of eye-strain or early need for glasses, the lighting at home by which the student works at night has been the chief provoking factor.

By all means look to your home lighting under which your children study. If you answer "yes" to these questions, your home lighting is faulty: Are frowns and scowls apparent? Are any bare lamp bulbs glaring out from beneath fixture bowl or lamp shade? Is the lamp on the study table short and squat so that it stands in a little pool of light? The light upon the study table should be diffused generously over the entire working space. There should be a well-selected ceiling fixture to provide lighting over the whole room.

Good lighting at home is a MOST important item in your child's back-to-school equipment. It is one of the least expensive items, too. When children have Better Light for Better Study, better grades invariably follow.
